Business Description

CUBE is an e-fashion platform, meant to address the difficulties of shopping online, by enhancing the online shopping experience with a virtual 3D reference model to emulate the user's body composition.

D) CUBE is an e-commerce platform that simplifies online shopping by offering accurate sizing and personalized fashion solutions. CUBE consolidates fashion brands and uses body-scanning technology to create a customizable avatar, which helps users visualize how clothes will fit their unique body shapes. This addresses sizing inconsistencies and makes shopping easier and more accessible for everyone, including those with disabilities. CUBE aims to reduce the need for returns while improving customer satisfaction by allowing consumers and retailers to make smarter, more sustainable fashion choices.

Mission

Increase e-shopper confidence, satisfaction, and reduce return rates.

D) CUBE's mission is to make online shopping easier by providing accurate sizing and a simple experience, ensuring customers find clothes that fit perfectly the first time, every time.

Problem / Opportunity

Shoppers aren't able to find a perfect fit online.

D) Online shoppers struggle to find clothes that fit properly. This challenge is due to inconsistent sizing across brands, making it difficult to visualize how clothes will look and fit on different body shapes. This leads to wasted time, unnecessary returns, and a less satisfying shopping experience.

Solution

The convenience of a virtual fitting room with all your favorite brands, all in one place.

D) CUBE is a virtual try-on platform that brings all fashion brands together in one place, making it easier for shoppers to find clothes that fit their unique body shapes. Using our customizable avatar and body-scanning technology, CUBE allows users, including those with disabilities, to visualize how clothes will look and fit. By simplifying the shopping process and providing

accurate results across multiple brands, CUBE will create a more accessible and inclusive experience for everyone.

Value Proposition

CUBE will help shoppers make selections that make more sense as it pertains to their preferred fit, and saves more dollars as they will have access to an array of comparable articles to optimize their selections.

People will save time, finding greater ease of use in locating desired apparel, and reducing the need to return items.

Shoppers can access the CUBE platform from anywhere they have access to WiFi, with the ability to shop and customize their avatar anywhere from the comfort of their devices.

Given how often companies ship and return items, a reduction in returns will lessen the impact of pollution that derives from transportation.

CUBE secures a profit with advertisement, service fees, and commissions.

D) CUBE's values proposition focuses on People, Planet, Place, and Profit. We save People time by providing a personalized sizing experience, reducing frustration. For the Planet, we cut down on returns and emissions by ensuring accurate sizing. We allow Americans to shop from any Place, making the experience convenient while saving time. Lastly, our Profit model is to help consumers make smarter choices and generate revenue through subscriptions and partnerships.

Business Strategy

Freemium, and premium services.

D) CUBE will begin establishing brand partnerships in January 2025 and launch a targeted marketing campaign starting in April 2025. We will grow brand awareness through strategic community engagement and collaborations like our involvement in Runway of Dreams and our partnerships with Instagram Streamers.

Business Model

Business to consumer, ads, subscriptions.

D) CUBE will generate revenue in three ways. Free users will experience a balanced 20% ad-to-content ratio, ensuring engagement while maximizing ad revenue. Premium users can access enhanced features and an ad-free experience for just \$1.99 per month, providing a

profitable recurring revenue stream. CUBE will earn a 2% commission on each sale made through the platform, aligning incentives and driving mutual growth with brand partners.

Target Market & Market Opportunity

D) CUBE's target market focuses on young women aged 14-34 from lower-to-middle-class backgrounds who value affordability, style, and convenience in their shopping experience. This group often faces challenges finding clothing that fits well, especially as active lifestyles and diverse body types call for more personalized solutions. CUBE also prioritizes inclusivity by addressing the needs of individuals with disabilities, offering adaptive sizing technology that promotes accessibility and confidence. With a growing nationwide demand for inclusivity in fashion, CUBE is positioned to transform the market, starting in the Hudson Valley and expanding its reach across the country.

Marketing & Sales

D) CUBE's marketing strategy focuses on creative outreach to attract free users through guerrilla advertising, our partnerships with Instagram influencers, and collaborations with streamers and streaming services to build brand awareness. For our paid users, we provide incentives like volume subscription discounts, free shipping, and a one-week free trial. By offering seamless features like one-click checkouts, we enhance the shopping experience, ensuring convenience and satisfaction for both free and paid users while driving overall growth in our company.

Underlying Magic

CUBE is the only retailer offering a customizable avatar, allowing users to virtually try-on, and buy clothes from all fashion brands.

Competition

Our competitors are all online clothing retailers. We are primarily focused on platforms like Amazon, Snapchat, and Styleme.

D) CUBE competes with both traditional fashion retailers like Amazon and Shein, as well as emerging adaptive fashion brands. These companies focus primarily on clothing production and catering to broad market needs. However, CUBE differentiates itself by addressing the critical challenge of accurate sizing and accessibility through advanced technology. Unlike Amazon and

Shein, which are mass-market giants, or StyleMe, which offers some personalized solutions, CUBE's patentable handicap avatar system and integration with ZOZOFit's body-scanning technology provide a uniquely tailored shopping experience. Rather than competing directly with these brands, CUBE positions itself as a complementary partner, offering a solution to improve sizing accuracy and accessibility, ultimately enhancing the offerings of fashion retailers while expanding market opportunities for adaptive fashion.

Management Team

Ahmet Ince is the CEO, Kodumuri Likith is the CIO, Kimani Frankson is the CMO, and Dominic D'Alessio is the CFO. Additionally, our team advisors consist of Chris Napolitano our strategy consultant, Matthew Meck our cyber security consultant, and Joppe Bijlsma as our partnership consultant.

D) CUBE is led by a diverse and experienced team. Ahmet Ince serves as the CEO, overseeing overall company strategy and growth. Kodumuri Likith, our CIO, leads the technology and development efforts, ensuring our platform stays ahead of the curve. Kimani Frankson, the CMO, drives our marketing initiatives and brand engagement. Dominic D'Alessio, the CFO, manages the company's financial health and resources. In addition, we have a talented group of advisors, including Chris Napolitano, our strategy consultant, who helps guide our business direction; Matthew Meck, our cybersecurity consultant, ensuring platform security; and Joppe Bijlsma, our partnership consultant, who works to expand strategic collaborations. Together, this team brings a unique blend of skills to drive CUBE's mission and success.

Values

D) CUBE's core values focus on inclusivity, innovation, sustainability, and collaboration. We believe everyone should have access to stylish and well-fitting fashion, no matter their body type or ability. Our technology is all about using innovative solutions to make shopping easier and more reliable, especially by ensuring a perfect fit. We care about the planet too, which is why we reduce waste by cutting down on returns and minimizing environmental impact. Finally, we collaborate with brands and retailers to improve the fashion industry by reducing returns and boosting customer loyalty, creating a win-win for everyone.

Vision

Revolutionizing e-fashion, by partnering with brands nationwide to propagate the use of virtual 3D reference models to try-on clothing from the comfort of any device equipped with WiFi.

D) CUBE's vision is to transform the fashion industry by becoming the leading provider in 3D reference models and personalized sizing technology. We aim to create a world where everyone can shop confidently for stylish, well-fitting clothing, making the shopping experience easier, more sustainable, and tailored to individual needs.

Goals & Objectives

D) In 2025, CUBE's first year, we will fully launch the product and secure 25 brand partnerships, establishing a strong foundation. In years two and three, we aim to exceed 82 million total sessions on the platform within the East Coast market, driving the company to break-even and solidifying our position in the market. From year four onward, our goal is to establish CUBE as the leading solution for adaptive fashion sizing, expanding nationally and becoming the go-to platform for inclusive fashion.

Current Status

D) CUBE is currently in the beta phase, with the technology under development and plans for a full product launch in July 2025. A targeted marketing campaign is set to begin with the Runway of Dreams event, located in Brooklyn, NY in September 2025.

Financial Model

D) CUBE's financial model is designed for high growth and long-term sustainability with three main revenue sources. Advertisement revenue is projected to make up 15% of total income in the first five years, as we balance ads with user experience. Commission fees from our brand partnerships are expected to be a scalable source of income, helping cover hosting and operational costs. Premium subscriptions will provide recurring monthly revenue, and are projected to contribute 37% of total revenue over the next five years, giving CUBE a solid financial foundation for growth.

SWOT

D)

Strengths

CUBE's patentable handicap avatar system, combined with ZOZOFit's body-scanning technology, delivers a unique solution that differentiates itself in the market. Our platform provides a seamless, highly accurate sizing experience, empowering users to make confident and informed fashion choices tailored to their unique needs.

Weaknesses

CUBE will need significant investments in advanced integration technology which includes risk of technical difficulties. Additionally, our investment in marketing efforts is essential to build brand awareness and trust within the adaptive fashion community and beyond.

Opportunities

As the demand for inclusive fashion continues to grow nationally, CUBE is well-positioned to enter a market that is still in its early stages, with a significant potential for global adoption as well. By enhancing our product with advancements in AI tailoring, we could improve the accuracy and personalization of CUBE's offerings, making the platform more attractive to users in the future.

Threats

As the inclusive fashion industry expands, competitors may develop similar solutions, potentially leading to market saturation and reduced adoption of our technology. Additionally, large players in the space, such as Amazon, pose a direct competitive threat, as their vast resources and reach could challenge CUBE's position in the market.

Funding

D) CUBE is seeking a \$275,000 investment for 10% equity to support our first-year costs. The funds will be used in five key areas. Legal expenses for our patent and business setup, licensing and integration of our partner's products, marketing for brand awareness, development to advance our platform, and hosting services to ensure scalable growth. This investment will provide the necessary resources for CUBE's successful launch and growth in year one.

Business Structure and Ownership

D) CUBE will be set up as a limited liability company, which will be operated by the four founders, each responsible for handling the day-to-day operations and holding 22.5% ownership each. CUBE is valued at \$3 million, and we are offering 10% equity in exchange for a \$275,000 investment. The investor will own 10% of the company, have principal ownership voting rights, and get a share of the profits.

Exit Strategy

CUBE has observed competitors adopt lucrative exit strategies. Zappos sold to Amazon for \$1.2 billion in 2009, and JCPenny sold to Simon for \$800 million in 2020. CUBE anticipates that Amazon may express interest in an acquisition by 2029.
